

Institutional Best Practices

- Annual Career guidance program for outgoing students during their Internship.

A comprehensive developmental program is organised every year to assist outgoing students in making and implementing informed educational and occupational choices. Students are equipped with necessary knowledge, skills and values to manage their career pathways and learning throughout their lives. This year a guest lecture by Dr Ashwat Kulkarni was conducted by KLE Alumni Association on 'Opportunities for dentistry in North America'.

- Well geared student mentoring system exists to support the student community

Dental course is full of opportunities and challenges. It can be a difficult time for students as one has to balance between the academics with everything else college life can offer. Our experienced mentors help students make the most of their college life, maximising academic potential and encouraging overall personal development.
